MAESTRO

MAESTRO · PRIVATE AI FOR REGULATED TEAMS

# Private AI that reads the room, and keeps your data private.

Chat, voice and video calls, a knowledge base and workflows, in one private instance for your firm. Every action the AI takes is checked against your rules and recorded.

WHY FIRMS BUY MAESTRO

# The AI your people want, on terms your risk team accepts.

Staff already paste client work into public AI apps. Maestro gives them the same speed inside a private instance your firm controls.

01

### Your data stays private

Your own application and database, stored in the EU. Our own licensed AI model, not an outside AI provider's service. Never used to train models.

02

### Every action governed

Each action the AI takes is checked against your rules, approved by a person where you require it, and recorded in an audit log.

03

### Talk to it like a colleague

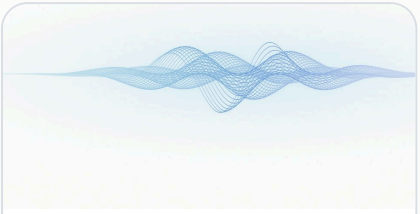
Voice and video calls on laptop or phone. It answers in context and adjusts how it speaks to the tone of the conversation.

04

### One fixed price

A flat monthly fee for a private instance. No per-word or per-token bills, subject only to fair use.

THREE WAYS TO BUY

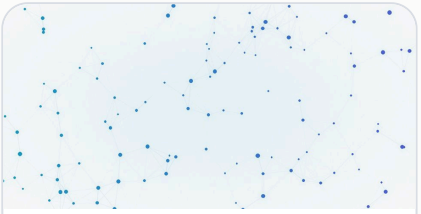


MAESTRO

## Core

The private AI engine: our own model, knowledge base and workflows, behind an OpenAI-compatible API.

**For AI companies selling into regulated markets**



MAESTRO

## Core + Companion

Private AI across the firm, with a voice and video companion for each officer and every action on record.

**For regulated firms: boards and compliance**

MAESTRO

## for Business

One shared assistant for a small team: voice agents, knowledge base, workflows and a secure dataroom.

**For professional firms of 3 to 10**

WHAT IT DOES

# An entire AI workplace inside your firm.

### Knowledge base

Ask your policies, contracts and rulebooks in plain language. Answers come with their sources.

### Workflows

Automate recurring work step by step, with a person's approval before anything is sent.

### Voice and video

Talk to Maestro on a call, on your laptop or phone. It answers by voice, in context.

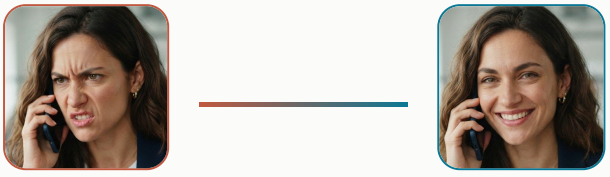
### Control

Roles, policies, an access inspector and an audit log of every action, for your admins.

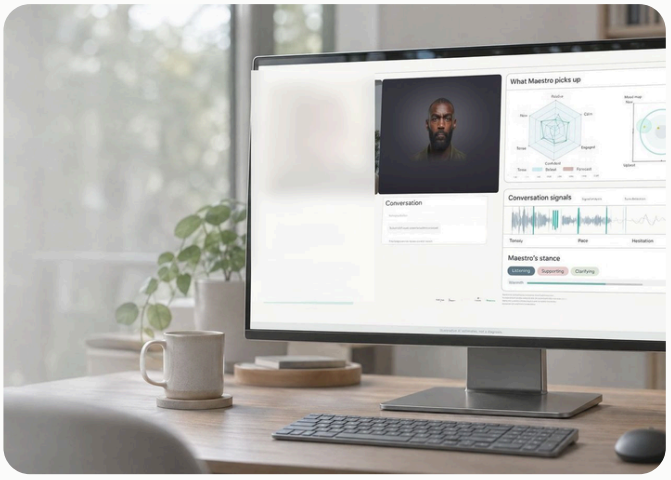
READS THE ROOM

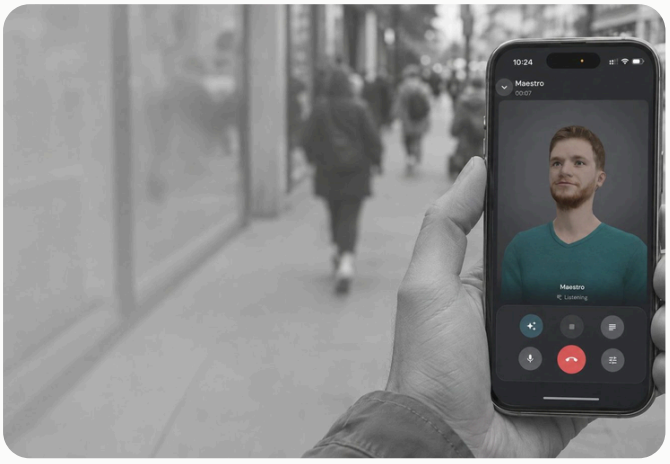
## Knows everything. Reads the room.

Business runs on people. Maestro picks up tone, pace and hesitation in a live conversation and adjusts how it speaks, so a tense call ends calmer. It never stores those signals or uses them to profile anyone, and you can switch it off.



TENSE CALM





VOICE, NOT CHAT

## Talk to it like a colleague.

- Listens, analyses and answers as you talk.
- Adjusts its tone and pace to the conversation.
- Tells people they are speaking with an AI.
- You always decide what happens next.

PRICING

# One fixed price. No per-word bills.

| PRICE | PLAN | STATUS |
|---|---|---|
| £150 a user a month | **Maestro for Business**<br>For small teams, from 3 users: platform, voice agents, knowledge base and a secure dataroom. | AVAILABLE NOW |
